

MICHEL DO

Senior Software Engineer · Full Stack

Technical Leadership · Business Applications · Application Modernization

Marseille, France · 06 22 71 40 63 · domichelviet+pro@gmail.com · linkedin.com/in/domichel/

PROFILE

Senior Software Engineer / Lead Developer with 10+ years of experience designing, rebuilding and evolving business applications. I work from requirements understanding through delivery, covering architecture, full-stack development, integrations, software quality, delivery industrialization and team support. My experience spans multiple backend and frontend ecosystems.

CORE SKILLS

Software Engineering: business applications · application modernization · APIs & integrations · architecture

Full Stack: backend · frontend · data · distributed systems

Technical Leadership: architecture · code review · mentoring · engineering standards · delivery industrialization

Product & Business: requirements analysis · Agile/Scrum · delivery · PO/UX collaboration

Technologies: PHP/Symfony · Python/Django · TypeScript · Vue.js · React · Node.js/NestJS

Data & Infrastructure: PostgreSQL · MySQL · Elasticsearch · RabbitMQ · Docker · AWS · Kubernetes/K9s

PROFESSIONAL EXPERIENCE

AddixGroup - RDT Logistic

Lead Full Stack Developer

01/2025 - 08/2026

Led a team of 5 developers through the complete rebuild of a logistics ERP, working closely with a Product Owner and a BA/UX Designer.

- Migrated, deduplicated and requalified customer data (SIREN, SIRET, VAT); redesigned the Company → Establishments data model.
- Designed the PostgreSQL relational model for business needs and performance; implemented permissions, roles, teams and validation workflows.
- Built a Symfony/Vue.js architecture using CQRS, RabbitMQ and dedicated services for accounting and transport booking.
- Implemented the Factur-X e-invoicing process and transmission to an approved platform.
- Introduced Scrum practices, engineering standards, code reviews, testing and GitLab CI/CD to industrialize delivery.

Technologies: Symfony · Vue.js · PostgreSQL · RabbitMQ · CQRS · Docker · GitLab CI/CD · Jira · Figma

R-Advertising

Full Stack Developer

08/2023 - 01/2025

Designed and developed an affiliate-link generation and management platform for websites, blogs and content creators.

- Built a product/affiliate-link catalog indexed in Elasticsearch and a dashboard tracking clicks, purchases, yield and other metrics.
- Implemented asynchronous processing with Symfony Messenger/RabbitMQ, AI-assisted product content generation and WordPress affiliate-link widgets.

Technologies: Symfony · Messenger · RabbitMQ · Elasticsearch · Twig · Docker · WordPress · Generative AI

Maison.fr

Lead Developer

08/2022 - 08/2023

Led a B2B team of approximately 5 people working on the platform for building-industry professionals.

- Developed features for credits, professional documents/certifications, sales/performance metrics, and integrations with Salesforce, Stripe and a BNP Paribas payment solution.
- Continued hands-on full-stack development with Symfony, React, TypeScript and Redux while providing technical guidance to the team.

Technologies: Symfony · React · TypeScript · Redux · MySQL · RabbitMQ · Salesforce · Stripe · Docker

Maison.fr

Full Stack Developer

10/2020 - 08/2022

Full-stack development of the B2B platform within a hexagonal architecture.

- Delivered complete React/TypeScript features using functional components, hooks, forms, routing, Redux, API calls and HTML/CSS integration.

Technologies: Symfony · React · TypeScript · Redux · MySQL · RabbitMQ · Docker

Groupe Viasphere / OK Service

Full Stack Developer

09/2019 - 10/2020

Rebuilt a field-service planning ERP and mobile WebApp for technicians working at customer premises.

- Implemented automatic technician/job assignment, distance calculation, route optimization and Leaflet-based mapping.
- Built field workflows with forms, photos, QR codes and equipment API calls; Vue.js WebApp on Android Crosscall devices; deployed on AWS.

Technologies: Laravel · Vue.js · MySQL · Leaflet · REST API · AWS

Avis Vérifiés / Net Reviews

R&D; Lead Developer

11/2018 - 08/2019

Led an R&D; team of 3 developers building new customer-facing tools.

- Built a statistics/KPI platform on Elasticsearch with charts, word clouds and reporting.
- Migrated data from MySQL to Elasticsearch using Python; generated PDFs with Chrome Headless; implemented customer SSO with LDAP.

Technologies: PHP · Angular · Elasticsearch · MySQL · Python · LDAP · Chrome Headless

Avis Vérifiés / Net Reviews

Web Developer

06/2017 - 11/2018

Developed and maintained the company's web services and delivered new product features.

Technologies: PHP · MySQL · HTML/CSS · JavaScript

Travaux.com

Web Developer

08/2016 - 06/2017

Application maintenance and development of a quotation-building tool for construction professionals.

- Built the AngularJS frontend, Silex backend/API and the product/service catalog used to create quotations.

Technologies: PHP · Silex · AngularJS · JavaScript · HTML/CSS

Yhapps

Web Developer

07/2015 - 05/2016

Developed, within a team of 4 developers and 1 Lead, a monolithic application for the medical imaging sector and an associated training website.

- Python/Django/PostgreSQL backend covering patient accounts, appointments, medical-image transmission and data security; HTML/CSS frontend.

Technologies: Python · Django · PostgreSQL · HTML/CSS

EDUCATION

- Professional Bachelor's Degree in Web Application Development & Digital Imaging — IUT Bordeaux 1 · 2015
- University Diploma in Multimedia & Internet — IUT Michel de Montaigne · 2014
- University Diploma in Computer Science — IUT La Rochelle · 2012
